## ORIGINAL PETITION

We the undersigned residents of Santa Cruz County, Arizona have been placed in a circumstance which threatens our safety and wellbeing by TEP/Unisource Energy's choice to place the new poles for the Vail to Valencia 115,000 to 138,000 volt upgrade at the extreme eastern side of the right-of-way between Calle Tiburon, and Camino Josephina. This routing causes the new power lines to run either extremely close to, or directly over some of the existing homes along the right-of-way.

We therefore do hereby respectfully petition the Arizona Corporation Commission to instruct the TEP/Unisource Energy to move its poles located between Calle Tiburon and Camino Josephina toward the western side of the right of way where the safety and wellbeing of no homes or residents will be adversely affected. Then move the route north of Camino Josephina to the eastern side of the right-of-way through the remainder of Santa Cruz County.

Signed
